### **Response to Amendment/Argument**

Applicant's amendment/argument filed on 5/2/06 has been carefully considered and entered. The argument has successfully convinced that the application is allowable.

### ***Specification***

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Allowable Subject Matter***

Claims 2-5, 7-11, and 13-15 are allowable.

The following is an examiner's statement of reasons for allowance: Claims 2, 3, 4, 5, 7, 8, 10, 11, 13, 14, and 15 are allowed over the prior art of record. The prior art of record considered individually or in combination fails to fairly teach or suggest claimed method comprising, among other limitations, a novel and unobvious limitation of "appending to said unique variable bit length binary representation a single bit representing the sign of the integer data" structurally and functionally interconnected with other limitations in the manner as cited in the claim and dependent claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Cited References***

The prior art made of record and not relied upon is considered pertinent to application's disclosures. The cited references relate to instant application subject matter.
